MOHAMMAD AIYAZ MAKANDAR

Full-Stack Developer | MERN Stack Developer

Banglore, Karnataka | +91 9075062751 Email: ayazmakandar625@gmail.com
LinkedIn: mohammad-aiyaz-makandar
GitHub: AiyazMohammed25

PROFESSIONAL SUMMARY

Recent Bachelor of Computer Applications (BCA) graduate with a strong foundation in full-stack web development and hands-on experience building independent academic and personal projects. Skilled in JavaScript, Python, Java, C++, React.js, Next.js, Node.js, Express.js, MongoDB, and modern web technologies. Passionate about developing scalable web applications, solving real-world problems, and continuously improving software development skills.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python, Java, C++, SQL
- **Frontend Technologies:** HTML5, CSS3, React.js, Next.js, Redux (Basic), Responsive Web Design
- **Backend Technologies:** Node.js, Express.js, PHP, REST APIs
- **Databases:** MongoDB, SQL
- **Tools & Platforms:** Git, GitHub, Visual Studio Code
- **Core Concepts:** Full-Stack Development, CRUD Operations, API Integration, Database Management, State Management, Responsive Design, Problem Solving

PROJECTS

QR-Menu

Technologies: JavaScript, React.js-Next.js, Node.js

- Built a digital QR code-based menu system with separate customer and admin interfaces for a seamless contactless menu viewing experience.
- Customer Side (Live): qr-menu-seven-rho.vercel.app
- Admin Side: qr-menu-seven-rho.vercel.app/admin (Note: Please contact me for the admin password)
- GitHub Repository: github.com/AiyazMohammed25/QR-Menu

Premium Cafe Template

Technologies: React.js-Next.js, JavaScript, HTML, CSS

- Developed a modern and highly responsive website template designed specifically for cafes and restaurants.
- Successfully deployed the application live on Vercel to ensure fast and scalable access.
- Live Demo: premium-cafe-template-ashen.vercel.app
- GitHub Repository: github.com/AiyazMohammed25/premium-cafe-template

DevNotes

Technologies: MongoDB, Express.js, React.js, Node.js (MERN Stack)

- Built a note management platform for organizing study notes and development resources.
- Implemented functionality for creating, editing, deleting, and managing notes.
- Developed responsive React-based user interfaces for desktop and mobile devices.
- Designed backend APIs and integrated MongoDB for persistent data storage.
- Applied full-stack development concepts including routing, API integration, and database operations.

City-Hub Management System

Technologies: HTML, CSS, PHP, JavaScript

- Designed and developed a centralized city information management system.
- Created responsive user interfaces using HTML, CSS, and JavaScript.
- Implemented backend functionality and form processing using PHP.
- Integrated database operations for storing and managing city-related records.
- Successfully demonstrated the completed project as part of academic evaluation.

EDUCATION

Bachelor of Computer Applications (BCA)

V.V Sangha College, Hospet | Sri Krishnadevaraya University

CGPA: 8.01 | Graduation: June 2026

ADDITIONAL INFORMATION

- Built academic and personal projects independently.
- Strong interest in Full-Stack Development, MERN Stack, and modern JavaScript technologies.
- Familiar with React.js, Next.js, MongoDB, API integration, and responsive web development.

Continuously learning advanced web development and software engineering practices.
